

Amendments to the Specification

Please amend the paragraph on page 22, lines 15-19 to read as follows:

Here, in this embodiment, the touch sensor 136 constitutes a portion of the "game operation means for operating the ~~game operation-control~~ means of the second game". However, the invention should not be limited to, but the "game operation means for operating the ~~game operation-control~~ means of the second game" may also be configured for detecting the operation for the player with a switch and for feeding the detection signal to the CPU 132.
